

Fujitsu fi-6750S

Fujitsu's entry level A3 flatbed production scanner fi-6750S scans up to 200 sheets in black and white and colour at similar speeds (55ppm/110ipm). The rotatable ADF which is positioned on top of the flatbed unit can be positioned at the centre or to the left, and the ADF direction can be adjusted to the operators' individual needs. This feature makes the fi-6750S particularly easy to use for both right and left-handed users, while its compact size makes it fit in the smallest office space.

Working Environment

The fi-6750S is a compact, multifunctional A3 simplex flatbed scanner with an attractive price-performance ratio. fi-6750S is suited for continuous batch scanning using the 200-sheet ADF, the A3 flatbed allows bound or fragile documents that cannot be passed through the ADF to be scanned.

Top Features

- Ergonomic ADF (positioning and direction can be adjusted)
- Scanning in colour without a loss of scanning speed: 55ppm/110ipm at 200/300dpi.
- Electronic colour dropout (RGB)
- 600dpi optical resolution, 50dpi - 600dpi output resolution
- "ADF Virtual Duplex scanning" with bundled ScandAll PRO software
- Ultrasonic double feed detection with intelligent multi-feed function
- Handles long documents up to 3m long
- Manual feeding mode

Accessories (not included)

- Black Document Pad for Flatbed cover
- Kofax VRS 4 Professional for Workgroup Scanning

Included

- ISIS and TWAIN drivers
- ScandAll PRO scan software
- Soft-IPC
- Adobe Acrobat® 8.0 Standard
- AC cable and USB cable
- User Manual

Scanning mode	Simplex
Document feed	Flatbed & ADF (200 sheets)
Document size	DIN A8 to A3, long documents up to 3m
Optical resolution	600dpi
Speed (A4, Portrait)	Simplex
B/W (200/300dpi)	55ppm
Colour (200/300dpi)	55ppm
Interface	USB 2.0
Dimensions (WxDxH)	690 x 500 x 342 mm
Weight	35 kg
Noise level (operating)	< 53 dB(A)
Noise level (stand-by)	38 dB(A)
